## Fabulous Fingerprint Identification

SF108KM is a fingerprint module based on capacitive sensing technology, with hardened surfaces and strengthened ESD. The build-in circuitries minimize external components quantity, and iMD's special core technology also enhance signal-detecting sensitivity to get better quality of image.

SF108KM is one of approach for IoT, access control, and contactless payments. It is easy to embed in devices to secure end-users property, and avoiding the risk of forgery or fraudulent charge.
