

## 9160A/9260A-DST

34Vp-p Single / Dual Channel Signal Amplifier

The 9x60A-DST is a bench-top, 2U, half 19" rack size, fully metal case, single or dual channel DC coupled wideband amplifier designed for high frequency, high current, signal amplification. While target applications include piezo-electronics, transducer characterization, MEMS, general electronics and scientific applications, with a high bandwidth of 45MHz, 34Vp-p into 50 ohms and up to 10W output power and a peak output current of 1A, the 9x60A-DST is the ideal complimentary amplifier to any signal source that needs a supporting power boost for demanding applications.

### Instrument Configuration

The 9x60A-DST can be configured to be used as two, single-ended independent channels, or as a one input with two differential outputs. The 9x60A's standard configuration enables a maximum output voltage of 34Vp-p into 50 ohms with a gain of x10. Other custom gain, such as x15 can be ordered at the time of the purchase, enabling clients' even wider variety of choices to solve their application.

### Output Characteristics

The outputs are located on the front panel. There are two outputs, one for each channel. When the 9x60A-DST is configured as two separate amplifiers, the outputs generate amplified signals within the range of 34Vp-p into matching load impedance at approximately 45MHz bandwidth.

### Input Characteristics

There are three inputs for each channel:

1. Main input, which is located on the front panel and is normally used for signal inputs.
2. Auxiliary input, which is located on the rear panel and can be used as a summing input.
3. DC Offset input, which is located on the rear panel and can be used for offsetting signal level within the specified output level window.

### Auxiliaries

The 9x60A-DST has two additional inputs for each channel allowing summation of two signals and providing an external control of DC level offset. These inputs are accessible from the rear panel only.

34Vp-p Single / Dual Channel Signal Amplifier

## Specifications

CONFIGURATION	
<b>9160A-DST</b>	1 single-ended output
<b>9260A-DST</b>	2 single-ended outputs; 1 differential output

INPUT CHARACTERISTICS	
<b>MAIN INPUT</b>	
<b>Connector:</b>	Front panel BNCs
<b>Impedance:</b>	50Ω
<b>Coupling:</b>	DC
<b>Damage Level:</b>	12Vp-p (-6V to +6V peaks)
<b>Differential Accuracy:</b>	4%

INPUT AUXILIARY	
<b>Connector:</b>	Rear panel BNCs
<b>Impedance:</b>	50Ω
<b>Coupling:</b>	DC
<b>Damage Level:</b>	12Vp-p (-6V to +6V peaks)

INPUT AUXILIARY	
<b>Connector:</b>	Rear panel BNCs
<b>Impedance:</b>	10kΩ
<b>Coupling:</b>	DC
<b>Damage Level:</b>	±2V
<b>Accuracy:</b>	7%

OUTPUT CHARACTERISTICS	
<b>Connectors:</b>	Front panel BNCs
<b>Source Impedance:</b>	0Ω
<b>Coupling:</b>	DC
<b>Protection:</b>	Short-circuit & Thermal
<b>Gain:</b>	x10, fixed
<b>Polarity:</b>	Normal
<b>Amplitude:</b>	34Vp-p into matching impedance

SQUARE WAVE CHARACTERISTICS	
<b>Transition Time:</b>	<10ns
<b>Aberrations:</b>	<10%

SINE WAVE CHARACTERISTICS	
<b>Bandwidth:</b>	-3dB
<b>Frequency Range:</b>	DC to 45MHz
<b>Harmonics Distortion:</b>	10Vp-p    25Vp-p (typ)
1MHz:	<-65dBc    <-54dBc
10MHz:	<-50dBc    <-45dBc
30MHz:	<-38dBc    <-30dBc

GENERAL	
<b>Voltage:</b>	85VAC to 265VAC
<b>Power Consumption:</b>	50W max.
<b>Dimensions (WxHxD):</b>	
With Feet	315 x 102 x 395 mm
Without Feet	315 x 88 x 395 mm
<b>Weight:</b>	
Without Package	3.5 Kg
Shipping Weight	5 Kg
<b>Temperature:</b>	
Operating	0°C to +40°C
Storage	-40°C to +70°C
<b>Warm up time:</b>	30 minutes
<b>Humidity:</b>	85% , non-condensing
<b>Safety:</b>	CE Marked, IEC61010-1:2010
<b>EMC:</b>	IEC 61326-1:2013
<b>Calibration:</b>	1 years
<b>Warranty:</b>	1 year

ORDERING INFORMATION	
MODEL	DESCRIPTION
<b>9160A-DST</b>	34Vp-p Single Channel Signal Amplifier
<b>9260A-DST</b>	34Vp-p Dual Channel Signal Amplifier
