#### SOLDERING CONDITIONS – DISPLAY TYPE LED

# RECOMMEND SOLDERING PROFILE

#### SOLDERING IRON

Basic spec is  $\leq$ 4 sec when 260°C. If temperature is higher, time should be shorter (+10°C→1 sec). Power dissipation of Iron should be smaller than 15W, and temperature should be controllable. Surface temperature of the device should be under 230°C.

# **REWORK**

Customer must finish rework within ≦4 sec under 245°C.
