Features

1.5kVA/1.35kW/230V Battery Backup for PC Networks, Security Systems or Digital Signage

This SmartPro® line-interactive UPS system with AVR protection provides reliable battery backup and AC power protection against blackouts, brownouts, overvoltages, surges and line noise that can damage valuable electronics or destroy data. The 230V battery backup is ideal protection for small networks, wiring closets, security systems, telecom, high-end PC gaming, digital signage equipment and other professional applications, including retail, casino and hotel/motel management. **Reliable, Expandable**

Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable internal battery provides 13.6 minutes of support at half load (675W) and 4.9 minutes at full load (1350W), allowing you to work through short power failures and giving you enough time to safely save files and shut down your system in case of a prolonged blackout. For mission-critical applications demanding scalable extended runtime, the UPS supports external battery packs, such as Tripp Lite's BP36V15-2U (sold separately). **Optional LX Platform Network Management Card Allows 24/7 Remote Access**

The optional WEBCARDLX (sold separately) with the latest version of PowerAlert Device Manager firmware (PADM20) provides enhanced remote management capabilities, including customizable dashboard graphs to fit user preferences. The PADM20 upgrade and Tripp Lite's PowerAlert Element Manager (PAEM) software form a powerful tool for expanding maintenance functions in large installations, including firmware update checks and backup and restoration of device configurations. Auto Probe allows a UPS with switched loads to automatically reboot devices if a network communication failure is detected. **8 Outlets Protect Your Connected Components**

Eight C13 outlets provide battery backup, 350 joules of surge protection and voltage regulation for your crucial components. Two independently switched two-outlet load banks enable both scheduled and real-time remote rebooting and load shedding. **C14 Power Input Accepts a Wide Range of Cordsets**

The C14 input connection accepts a variety of detachable cordsets to match country- or site-specific wall outlets. Two C13-to-C14 and one C13-to-Australian power cables are included. **Automatic Voltage Regulation (AVR) Corrects Low- and High-Voltage Conditions**

AVR protects your equipment from incremental hardware damage, data loss and performance problems caused by brownouts and overvoltages. The SMX1500XLRT2U can correct brownouts as low as 158V and overvoltages as high as 278V back to nominal 230V power continuously, all while keeping the battery fully charged and ready to take over in case of power failure. **Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better**

This UPS system filters out disruptive electromagnetic and radio frequency interference that can inflict
