

Description

The 10-5/8" x 6-5/8" x 1-9/16" Zerust Series Tuff-Tainer features Flambeau's patented and licensed polymer-based Zerust material, which emits a harmless, odorless vapor that fills the inside of the storage box and forms a protective layer around metal objects while they are stored. Zerust is molded directly into the plastic and requires no maintenance. Thanks to Zerust, tools and parts are protected from rust and corrosion for up to five years.
