

# FAN1538

## Dual Channel 1A Low Dropout Linear Regulator with UVLO and Soft-start

### Features

- Two independent outputs
- Load regulation: 0.05% typical
- Under-voltage lockout and softstart
- Over Temperature protection
- T0-252 DPAK, 5-lead SPAK packages
- Fixed 3.3V and adjustable or fixed 2.5V output

### Applications

- Hard Disk Drives, CD-Roms
- Set-top Boxes
- ADSL line cards
- Motherboards with multiple supplies

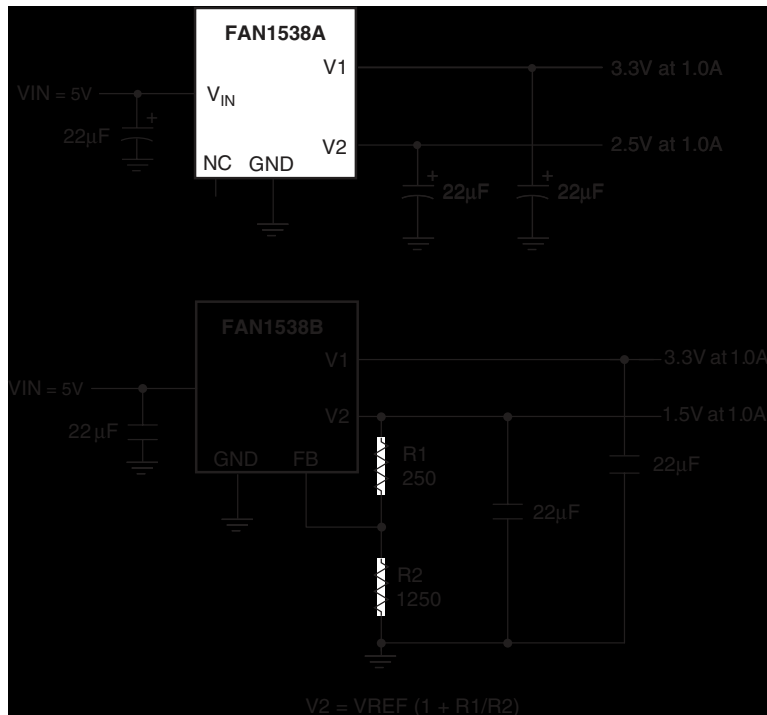

### General Description

The FAN1538 provides two output voltages: a fixed 3.3V output and either a fixed 2.5V or adjustable output with 1A output current capability. Refer to Ordering Information for details.

Current limit protects against short circuit currents and on chip over temperature circuitry limits the maximum die temperature.

Under voltage lockout and softstart circuitry protects against unregulated output voltages when the input voltage is below specification.
