

Octopus Passive buzzer Brick OBPB01

The Pi Supply Octopus passive buzzer brick is a buzzer module whereby the volume can be controlled by PWM.

What are Octopus Electronic Bricks?

Pi Supply Octopus Electronic Bricks can be used to build electronics projects just as easy as piling bricks. You can also connect Arduino compatible boards easily with various digital, analog and I2C/Uart interfaces. The breadboardless connections let you connect expansion modules like potentiometers, sensors, relays, servos, buttons in a plug and play way.

What's Included

- 1 x Passive buzzer Brick
- 1 x Analog Sensor Cable

Specification

Power supply needs: 5V

• Interface type: Analog

Pin Definition: S-Sigal V-VCC G-GND

Wide detecting scope

High sensitivity

• Simple drive circuit

Stable and long life

• Size: 19x27mm
