## 1. Application

This specification delivers Digi-Key.

SAW Oscillator, KC7050Yxxx.xxxP30EZU applies to 75.0000, 125.000, 156.250, 200.000, 250.000, 312.500MHz.

## 2. Function

### 2-1. Absolute Maximum Rating

| Item                      | Symbol           | Rating                       | Unit |
|---------------------------|------------------|------------------------------|------|
| Power Supply Voltage      | Vcc              | -0.3 to +5.0                 | ٧    |
| Input Voltage             | V <sub>IN</sub>  | -0.3 to V <sub>CC</sub> +0.3 | V    |
| Storage Temperature Range | T <sub>STG</sub> | -55 to +125                  | Ç    |

Note: If KC7050Y is used beyond absolute maximum ratings, it may cause internal destruction.

KC7050Y should be used under the recommended operating conditions. KC7050Y reliability may be damaged if those conditions are exceeded.

## 2-2. Recommended Operating Condition

| ltem                        | Symbol           | Min  | Тур | Max             | Unit | Remarks |
|-----------------------------|------------------|------|-----|-----------------|------|---------|
| Power Supply Voltage        | V <sub>CC</sub>  | 2.97 | 3.3 | 3.6             | V    |         |
| Input Voltage               | V <sub>IN</sub>  | 0    |     | V <sub>CC</sub> | V    |         |
| Operating Temperature Range | T <sub>OPR</sub> | 0    | +25 | +70             | C    |         |

## 2-3. Electrical Characteristic Specifications

| Item                                   | Symbol           | Min                    | Тур   | Max                    | Unit | Remarks  |  |
|--|------------------|------------------------|-------|------------------------|------|--|--|

|---|--------|---------------------|

<sup>\*</sup>The Time Interval Analyzer "Wavecrest DTS-2079" with VISI 6.3.1 shall measure jitter.

#### 2-4. Measurement Condition

Unless otherwise specified, the standard range of atmospheric conditions for making measurements and tests are as follows:

Ambient temperature : 15℃ to 35 ℃
Relative Humidity : 25% to 85%
Air pressure : 86kPa to 106kPa

If there is any doubt about the results, measurements shall be made within the following limits:

• Ambient temperature : 25℃

Relative Humidity : 60% to 70%Air pressure : 86kPa to 106kPa

Unless otherwise specified for each item, it should be specified according to JIS (Japanese industrial Standard).

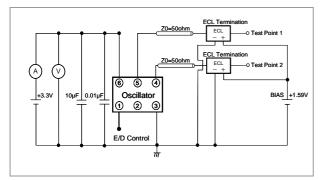

#### 2-5. Measurement Circuit

The test circuit as shown in "Fig. 1" (\*Jitter Test Circuits "Fig. 3") shall measure electric characteristics.

**ECL Termination 10086A (Agilent)** 

### 2-6. Clock Timing Chart

The clock timing chart as shown in "Fig. 2".

**Fig.1 Test Circuits** 

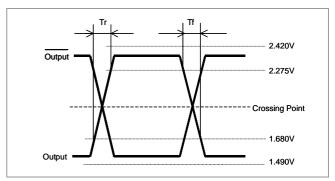

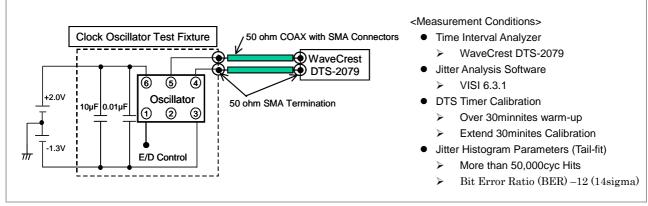

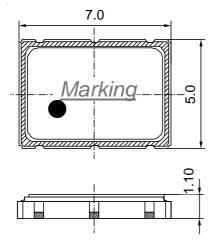

Fig.2 Clock Timing Chart (PECL Output)

| (Fine leak)  | (MIL-STD-883D-1014.10 Condition A1)                        | SXIU Pa III /Sec IIIax           |  |  |

Note:After above Test, it shall be subjected to standard atmospheric conditions for 2 hours, after which measurement shall be made. And result of the test shall satisfy **Table 1** 

## Table2

6. Recommended Land pattern and soldering Guide

Since KC7050Y series has no Bypass Capacitor between  $V_{CC}$  and GND, Please mount high frequency type capacitor  $0.01\mu F$  and  $10\mu F$  to the nearest position of oscillator.

## 7. Taping Specifications

## 7-1. Taping Quantities:

- The tape of one reel shall pack with maximum 500 pcs.
- KC7050Y shall be contained continuously in pocket.

## 9. The agreement of this specifications

If you find further points in this specifications, contact us within 45 days after the date of issue.

## 10. Remarks on Usage

#### 10-1. Storage Condition

Parts should be stored in temperature range of -5 to +40°C, humidity 40 to 60% RH, and avoid direct sunlight. Then use within 6 months.

## 10-2. Handling Condition

Although KC7050Y has protection circuit against static electricity, when excess static electricity is applied, the inside IC may get damaged.

When mounting on PCB, please make sure the direction of KC7050Y is correct, otherwise KC7050Y will increase in temperature and may damaged.

Please do not use KC7050Y under unfavorable condition such as beyond specified range in catalogue or specification sheet.

When using an auto-mounting machine, select the one which give silent impulse as little as possible to the relevant components and operate it with much attentive confirmation so that it may not cause damaged.

After making the KC7050Y mounted on a printed circuit board, if it is required to divide the printed circuit board into another one, use it with attentive confirmation so that a warp cased by this division might not affect any damage. When designing a printed circuit board as well as handling the mounting location, the printed circuit board has to be being stress free area as much as possible.

Please do not use KC7050Y under condition in the water or salt water will drop on KC7050Y and under environment of dew or harmful gas.

#### 10-3. Soldering

Please use KC7050Y under condition "IR or Vapor phase Reflow "only.

## 10-4. Washing Condition

If KC7050Y is applied ultrasonic, it may be inferior and destroy.

Please don't use ultrasonic cleaner.

In case of using KC7050Y without above precaution, Kyocera is unable to guarantee the specified characteristics.
