

Netting, 2" Mesh, 50' x 25' Product ID: 700-10027

Overview

When learning to fly an sUAV, a netting barrier between pilot and observers and the aircraft is a wise additional precaution. This strong bird netting may be hung from a ceiling or affixed over a frame of your own construction. We offer it here as an accessory for our ELEV-8 Quadcopter.

- Overall size: 50 x 25 feet (15.24 x 7.62 meters)
- Mesh size: 2" (5 cm) square
- Material: UV resistant black nylon multifilament
- Weight: approximately 6 lbs (2.7 kg)

Of course, netting is just one of many elements to reducing the chances of potential mishaps! Check out our ELEV-8 Quadcopter Tutorials, including UAV Safety, Laws, and Good Citizenship, and also How to Fly a Multirotor sUAV (linked under Additional Resources).
