

EasyPACK™ module with EDT2 IGBT and diode and PressFIT / NTC

Features

- Electrical features
 - Blocking voltage 750 V
 - Low $V_{CE,sat}$
 - Low switching losses
 - Low Q_g and C_{rSS}
 - Low inductive design
 - $T_{vj,op} = 150^{\circ}C$
- Mechanical features
 - 4.2 kV DC 1 second insulation
 - High creepage and clearance distances
 - High power density
 - Integrated NTC temperature sensor
 - PressFIT contact technology
 - RoHS compliant
 - UL 94 V0 module frame

Potential applications

- Automotive applications
- (Hybrid) electrical vehicles (H)EV
- Motor drives

Product validation

- Qualified according to AQG 324

Description

The FF300R08W2P2_B11A is a very compact and flexible product offering integrated isolation for the main inverter of hybrid and electric vehicles. The module uses the benchmark EDT2 IGBT generation allowing 750V blocking voltage and I_{cN} of 300A. The chipset has benchmark current density combined with short circuit ruggedness for reliable inverter operation under harsh environmental conditions. The EDT2 IGBTs also show excellent light load power losses, which helps to improve system efficiency over a real driving cycle. The EDT2 IGBT was optimized for applications with switching frequencies in the range of 10 kHz. The EasyPACK™ package is qualified for automotive applications and is validated according to AQG 324. Its high power cycling capability as well as the high creepage and clearance distances add to the product reliability.

The power module comes with PressFIT Pins for the signal terminals to avoid additional time consuming selective solder processes, which provides cost savings on system level and increases system reliability.
