Introduction

ADAM-6520 is a 5-port industrial-grade switch with Ethernet connectivity and from 10 to 100 Mbps transfer rates. (Auto-negotiation). Just like any other product in the ADAM family, ADAM-6520 can be mounted in three different ways: DIN rail, Wall and Stack. Solid industrial-grade design assures reliable operation in common application areas like: semi-conductor factories, inventory control environments, assembly lines, manufacturing and many more.

All modules support a wide voltage range of $+10 \sim 30 \text{ V}_{DC}$ over the terminal block, and $3{,}000 \text{ V}_{DC}$ surge (EFT) protection ensures that over-voltage is no concern. The wide operating temperature of ADAM-6520 goes from $-10 \sim 70^{\circ}$, while ADAM-65201 from $-40 \sim 85^{\circ}$. This permits them to be functional in harsh environments.

The six inclusive LED indicators make troubleshooting of the modules easier. Each port has a pair of LEDs that indicate link status and port activities. This easily informs users of any collisions, the link status, power failure and data receipts for immediate on-site diagnosis.
