# Battery Charger ID

Dialog Battery Charger Identification (BCID) products are USB devices that combine high-speed USB switches with a USB host charger (dedicated charger) identification circuit. These devices support the most current USB Battery Charging specification Revision 1.2 including data contact detection and set resistor biases for Apple* and Samsung** compliant devices. These devices also support legacy USB D+/D- short detection using data-line pull up resistors.
BCID Features

- USB 2.0 Battery Charging Specifications (BC) 1.1 & 1.2
- Chinese Telecom Standard YD/T 1591-2009
- Proprietary Apple* dedicated charger scheme (2.4 A)
- Supports Samsung** Galaxy Tab charging scheme
- Supports Full/Low speed mouse/keyboard wake-up function from S3 (Sleep) mode
- Supports SDP, CDP, DCP Handshaking Protocol
- Smart-CDP Function
- Small 2 x 2 mm, TDFN-8 packaging
- Low supply current operation

* Apple iPhone, iPad, and iPod are trademarks of Apple Inc., registered in the U.S. and other countries.

** Samsung Galaxy Tab are trademarks of Samsung Electronics, registered in Korea and other countries

Dialog BCID Products Enable Universal Charging Solutions

Standard	Voltage/Current
USB 2.0 BC 1.1 & 1.2	5V, 500mA / 5V, 1.5A
Chinese Telecom Standard YD/T 1591-2009	5V, 500mA / 5V, 1.5A
Apple Proprietary	5V, 1A / 5V, 2A / 5V, 2.4A
Samsung Galaxy Tablet	5V, 2.4A
Qualcomm Quick Charge	5V, 3.00A / 9V, 1.60A / 12V, 1.25A / 20V, 1.00A

## Feature New Products: SLGC55545V and SLG55546V

- **Single Chip BCID Solution**

  – BCID Fast Charge Identification

  – USB 480 Mbps Bus Switch

  – 2.5 A USB Current Limiter

- **Auto-DCP mode**: Automatically detects and selects the right resistor divider values by monitoring D+/D- voltage and timing.

- **CDP Support (SLGC55545V):** Supports newer smartphones that are compatible with CDP.

- **Smart-CDP function (SLG55546V)**: Automatically switches between SDP and CDP mode to support older version of smartphones that don't support CDP.

- **Auto wake up power saving mode**: BCID will automatically wake up or power down when USB cable is plug in or out of the connector. This features reduces system power consumption to comply with European standby power requirement.

- **Keyboard & mouse** wake up for notebook Always-On-USB Port application: Maintains D+/D- communicate line between mouse/keyboard USB Dongle to chipset during notebook hibernate state. This allows chipset to wake up when a user clicks on or touches the mouse/keyboard.

- **Port Power Management.** When two BCID are deployed, in parallel, in the same system, one BCID can send STATUS# signal to another BCID to select current allocation.

  Samsung Galaxy
  480Mbps USB Switch
  2.5 A Current Limiter

Product Compatibility

Dialog has officially tested compatibility with hundreds of USB devices, including smart phones, tablets, PCs, media players, GPS receivers, and other portable devices in the market.
