# ioThinx 4500 Series (45MR) Modules

## Modules for ioThinx 4500 Series

#### **Features and Benefits**

- · Easy tool-free installation and removal
- Built-in LED indicators for IO channels
- Wide operating temperature range: -40 to 75°C (-40 to 167°F)

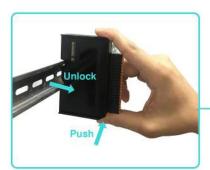

#### Introduction

Moxa's ioThinx 4500 Series (45MR) Modules are available with DI/Os, Als, relays, RTDs, and other I/O types, giving users a wide variety of options to choose from and allowing them to select the I/O combination that best fits their target application. With its unique mechanical design, hardware installation and removal can be done easily without tools, greatly reducing the amount of time required to set up and replace the modules.

#### Easy Tool-Free Installation and Removal

The ioThinx 4500 Series has a unique mechanical design that reduces the amount of time required for installation and removal. In fact, screwdrivers and other tools are not required for any part of the hardware installation, including mounting the device on a DIN-rail, as well as connecting the wiring for both communication and I/O signal acquisition. Furthermore, no tools are required to remove the ioThinx from a DIN-rail. Removing all of the modules from a DIN-rail is also easy using the latch and release tab.

Unmount single modules easily with a push and unlock design
