7.0 PACKAGING

Parts shall be packaging to protect the parts from damage during standard shipping, storage, and handling. Refer Molex.com specific part number webpage to get the exact packaging document for that item.

8.0 SHELF LIFE

Tin Plated Terminals will have shelf life of 18 months from the date of manufactured.

9.0 CABLE TIE AND / OR TWIST TIE LOCATION

CKT Size	Dim T Min.
2	22.18
3	32.27
4	42.35
6	22.18
9	32.27
12	42.23
15	52.31

The "T" dimension defines a "free" length of wire, or a length of wire that is not subject to significant bias by external factors such as a wire tie, wire twisting, or other means of bending or deforming of the wires that repositions them from their natural relaxed state or location where they enter the housing. Wires are to be dressed in such a manner to allow the terminals to float freely in the pocket. This dimension is general recommendation and may need to be adjusted for different wire gauges and wire type and insulation thickness and insulation material.
