WLAN3002C

WLAN LNA + switch

Rev. 6 — 19 July 2019 **Product data sheet**

1 General description

The WLAN3002C is a fully integrated MMIC Low-Noise Amplifier with RX-TX SP2T switch for WLAN applications in the 4.9 GHz to 5.925 GHz ISM band. Manufactured using high performance QUBiC eighth generation SiGe:C technology of NXP.

The WLAN3002C combines best-in-class noise figure, linearity, efficiency, low insertion loss CMOS switches with the process stability and ruggedness that are the hallmarks of SiGe:C technology.

The WLAN3002C has a 1.5 mm x 1.5 mm footprint HX2SON8 package and a thickness of 300 µm.

2 Features and benefits

- Covers full ISM high band 4900 MHz to 5925 MHz
- Noise figure = 2.4 dB
- Gain 13.5 dB
- High input 1 dB compression point $P_{i(1dB)}$ of 0 dBm
- High in band $IP3_i$ of 6 dBm
- Supply voltage 2.7 V to 5.25 V
- Bypass mode current consumption of 3.5 µA
- Optimized performance at low supply current of 10.0 mA
- Integrated concurrent 2.4 GHz notch filter
- 4 modes of operation (high gain receive, bypass receive, transmit, and isolation modes)
- Integrated matching for input and output
- Requires only supply decoupling capacitors
- ESD protection on all pins (HBM > 2 kV)
- Small 8-pin leadless package 1.5 mm x 1.5 mm x 0.30 mm; 0.4 mm pitch

3 Applications

- IEEE 802.11a/n/ac WiFi, WLAN
- Smartphones, tablets, netbooks, and other portable computing devices
- Access points, routers, gateways
- Wireless video
- General-purpose ISM applications

4 Quick reference data

Table 1. Quick reference data

f = 5400 MHz; V_{CC} = 3.6 V; T_{amb} = 25 °C; V_{IH} = 3.3 V; V_{IL} = 0 V; Z_S = Z_L = 50 Ω; P_i = -30 dBm unless otherwise specified. All measurements done on application board, see Figure 3 with tracks and SMA connectors de-embedded.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
RF performances at ANT-RX path in high gain receive mode.[1]						
I_{CC}	supply current	high-gain receive mode [1]	-	10.0	13.0	mA
G_{tr}	transducer power gain		11.5	13.5	16	dB
NF	noise figure		-	2.4	-	dB
$P_{i(1dB)}$	input power at 1 dB gain compression	in-band	-	0	-	dBm
RL_{in}	input return loss		-	11	-	dB
RL_{out}	output return loss		-	15	-	dB
RF performance at ANT-RX path in bypass receive-mode [1]						
I_{CC}	supply current	bypass receive mode [1]	-	3.5	12	µA
G_{tr}	transducer power gain		-9	-7	-5	dB
RF performance at ANT-TX path in transmit mode [1]						
α_{ins}	insertion loss		-	0.7	-	dB
RF performance at TX-ANT path in isolation mode [1]						
ISL	isolation	4.8 GHz to 5.0 GHz	-	11	-	dB

[1] See Table 5

5 Ordering information

Table 2. Ordering information

Type number	Orderable part number	Package		
		Name	Description	Version
WLAN3002C	WLAN3002CZ	HX2SON8	plastic, thermal enhanced super thin small outline package; no leads; 8 terminals; body 1.5 x 1.5 x 0.30 mm	SOT1260-1

6 Marking

	YWW: Year & Week code

7 Functional diagram

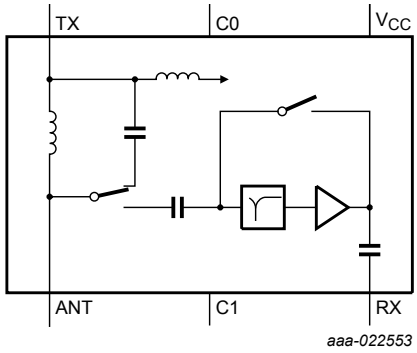

Figure 1. Functional diagram

8 Pinning information

8.1 Pinning

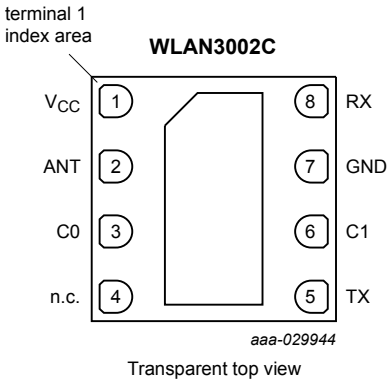

Figure 2. Pin configuration

8.2 Pin description

Table 4. Pin description

Symbol	Pin	Description
V_{CC}	1	supply voltage
ANT	2	antenna input / output
C0	3	C0 control pin, internal pull-down
NC	4	not connected to internal circuit; connect to PCB ground
TX	5	transmit input
C1	6	C1 control pin, internal pull-down
GND	7	ground
RX	8	receive output
GND	exposed die pad	ground

9 Functional description

Table 5. Control signal truth table

Control signal setting		Mode of operation			Mode name
V_{C0}	V_{C1}	SP2T switch		LNA	
(pin 3)	(pin 6)	ANT-RX	ANT-TX		
HIGH	HIGH	ON	OFF	OFF	bypass receive mode
HIGH	LOW	ON	OFF	ON	high-gain receive mode
LOW	HIGH	OFF	ON	OFF	transmit mode
LOW	LOW	OFF	OFF	OFF	isolation mode

10 Limiting values

Table 6. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). See section18.3 "Disclaimers", paragraph "limiting values".

Symbol	Parameter	Conditions	Min	Max	Unit
V_{CC}	supply voltage		-0.3	6	V
$V_{I(C0)}$	input voltage on pin C0	$V_{i(C0)} < V_{CC} + 0.5$ V	-0.3	4	V
$V_{I(C1)}$	input voltage on pin C1		-0.3	4	V
$V_{i(ANT)}$	input voltage on pin ANT	DC	-0.3	+0.3	V
$V_{i(TX)}$	input voltage on pin TX	DC	-0.2	+0.2	V
$V_{i(RX)}$	input voltage on pin RX	DC; $V_{i(RX)} < V_{CC} + 1.5$ V	-0.3	+3.6	V
$P_{i(ANT)}$	input power-on pin ANT	continuous wave; high-gain receive mode	-	7	dBm
		continuous wave; bypass receive mode	-	19	dBm
		continuous wave; isolation mode	-	19	dBm
$P_{i(TX)}$	input power-on pin TX	continuous wave; transmit mode	-	33	dBm
T_{stg}	storage temperature		-65	+150	°C
V_{ESD}	electrostatic discharge voltage	Human Body Model (HBM) according to ANSI/ESDA/JEDEC standard JS-001	-	±2000	V
		Charged Device Model (CDM) according to ANSI/ESDA/JEDEC standard JS-002	-	±500	V

11 Recommended operating conditions

Table 7. Recommended operating conditions

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
f	frequency		4900	-	5925	MHz
V_{CC}	supply voltage		2.7	3.6	5.25	V
V_{IH}	HIGH-level input voltage	[1]	1.62	-	V_{CC} -0.2 V	V
V_{IL}	LOW-level input voltage		0	-	+0.4	V
T_{amb}	ambient temperature	air temperature	-40	-	+85	°C

[1] Input voltage V_{IH} pins C0, C1. Input voltage must not exceed 3.6 V.

12 Thermal characteristics

Table 8. Thermal characteristics

Symbol	Parameter	Conditions	Typ	Unit
$R_{th(j-a)}$	thermal resistance from junction to ambient		250	K/W

13 Characteristics

Table 9. DC characteristics

V_{CC} = 3.6 V; T_{amb} = 25 °C; V_{IH} = 3.3 V; V_{IL} = 0 V; Z_S = Z_L = 50 Ω; P_i = -30 dBm unless otherwise specified. All measurements done on application board, see Figure 3 with tracks and SMA connectors de-embedded.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
I_{CC}	supply current	high-gain receive mode [1]	-	10.0	13.0	mA
		bypass receive mode [1]	-	3.5	12	µA
		transmit mode [1]	-	150	300	µA
		isolation mode [1]	-	3.5	12	µA
$I_{ctrl(C0)}$	control current on pin C0		-	10	15	µA
$I_{ctrl(C1)}$	control current on pin C1		-	4	10	µA

[1] See Table 5

Table 10. Transient characteristics

V_{CC} = 3.6 V; T_{amb} = 25 °C; V_{IH} = 3.3 V; V_{IL} = 0 V; Z_S = Z_L = 50 Ω; P_i = -30 dBm unless otherwise specified. All measurements done on application board, see Figure 3with tracks and SMA connectors de-embedded.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
t_{on}	turn-on time	[1]	-	-	500	ns
t_{off}	turn-off time	[1]	-	-	400	ns

[1] From within 10 % of the initial gain to within 10 % of the final gain.

Table 11. RF characteristics

f = 5400 MHz; V_{CC} = 3.6 V; T_{amb} = 25 °C; V_{IH} = 3.3 V; V_{IL} = 0 V; Z_S = Z_L = 50 Ω; P_i = -30 dBm unless otherwise specified. All measurements done on application board, see Figure 3 with tracks and SMA connectors de-embedded.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
RF performance at ANT-RX path in high-gain receive mode [1]						
G_{tr}	transducer power gain		11.5	13.5	16	dB
$G_{p(flat)}$	power gain flatness	peak-to-peak over any 80 MHz band	-	-	0.5	dB
NF	noise figure		-	2.4	-	dB
$P_{i(1dB)}$	input power at 1 dB gain compression	in-band	-	0	-	dBm
$IP3_i$	input third-order intercept point	20 MHz tone spacing; P_i = -20 dBm per tone	-	6	-	dBm
RL_{in}	input return loss		-	11	-	dB
RL_{out}	output return loss		-	15	-	dB

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
RF performance at ANT-RX path in bypass receive-mode.[1]						
G_{tr}	transducer power gain		-9	-7	-5	dB
$G_{p(flat)}$	power gain flatness	peak-to-peak over any 80 MHz band	-	-	0.5	dB
$P_{i(1dB)}$	input power at 1 dB gain compression	in-band	-	17	-	dBm
$IP3_i$	input third-order intercept point	20 MHz tone spacing; P_i = -3 dBm per tone	-	29	-	dBm
RL_{in}	input return loss		-	12	-	dB
RL_{out}	output return loss		-	20	-	dB
RF performance at ANT-TX path in transmit mode.[1]						
α_{ins}	insertion loss		-	0.7	-	dB
$G_{p(flat)}$	power gain flatness	peak-to-peak over any 80 MHz band	-	-	0.2	dB
ISL	isolation	measured between pin RX and pin TX	-	30	-	dB
$P_{i(1dB)}$	input power at 1 dB gain compression	in-band	-	32	-	dBm
RL_{in}	input return loss		-	17	-	dB
RL_{out}	output return loss		-	17	-	dB
RF performance at TX-ANT path in isolation mode. [1]						
ISL	isolation	4.8 GHz to 5.0 GHz	-	11	-	dB

19 Legal information

19.1 Data sheet status

Document status[1][2]	Product status[3]	Definition
Objective [short] data sheet	Development	This document contains data from the objective specification for product development.
Preliminary [short] data sheet	Qualification	This document contains data from the preliminary specification.
Product [short] data sheet	Production	This document contains the product specification.

[1] Please consult the most recently issued document before initiating or completing a design.
[2] The term 'short data sheet' is explained in section "Definitions".
[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nxp.com.

19.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

19.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors. In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory. Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the Terms and conditions of commercial sale of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification. Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products. NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nxp.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Quick reference data — The Quick reference data is an extract of the product data given in the Limiting values and Characteristics sections of this document, and as such is not complete, exhaustive or legally binding.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Non-automotive qualified products — Unless this data sheet expressly states that this specific NXP Semiconductors product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. NXP Semiconductors accepts no liability for inclusion and/or use of non-automotive qualified products in automotive equipment or applications. In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without NXP Semiconductors' warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond NXP Semiconductors' specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies NXP Semiconductors for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond NXP Semiconductors' standard warranty and NXP Semiconductors' product specifications.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
