## **RoHS 2, REACH, and Conflict Minerals Statement**

None of the RoHS 2 restricted materials or REACH (Registration, Evaluation and Authorization of Chemicals) substances of very high concern as of 2020/06/25, or Conflict Minerals are intentionally added in manufacturing this product. Ref: European Union Directive 2015/863/EU and Regulation (EC) No. 1907/2006/CE.

## Description

This efficient desiccant begins working by absorbing airborne moisture left inside the bag when you've finished vacuum packaging, capturing moisture that manages to pass through the bag material. Secured in a strong pouch of either clean room grade, sulphur-free, non-woven Tyvek<sup>®</sup> or economical kraft paper, desiccant helps keep your devices dry, even through unexpected shipping delays or longer than anticipated storage time.

## Specifications

Properties Pouch Unit Sizes Media Packaging **Typical Values** Non-Woven Tyvek® or Kraft Paper 1/6, 1/3, 1/2, 1, 2, 4, 8, 16 Montmorillonite Clay Air-tight pails or drums

The recommended amount of desiccant is dependent on the interior surface area of the bag to be used. Below is a reference table indicating recommended minimum amounts of desiccant that should be used with <u>Moisture Barrier Bags</u>. Note: number units rounded up.

As packaged SCS Desiccant in Tyvek<sup>®</sup> and Kraft pouches meets MIL-D-3464, Type I and II and is on the QPL (Qualified Product List).
