

Evaluating the **ADM3050E** 5.7 kV rms, Signal Isolated, Basic CAN FD Transceiver

FEATURES

- ADM3050E** 12 Mbps isolated CAN FD transceiver
- 2-layer PCB with low radiated emissions, passes EN 55022 Class B
- On-board LDOs for 6 V to 9 V supply, providing 5 V to the **ADM3050E** V_{DD1} pin and V_{DD2} pin
- Screw terminal connectors for the following:
 - 6 V to 9 V LDO, 5 V power supply to the V_{DD1} pin
 - 1.8 V to 5.0 V direct power supply to V_{DD1} pin
 - 6 V to 9 V LDO, 5 V power supply to the V_{DD2} pin
 - 5 V direct power supply to V_{DD2} pin
 - TXD pin, RXD pin, CANH pin, CANL pin signals
 - Divided PCB return planes for GND₁ and GND₂
- SMA connectors for TXD pin and RXD pin signals

EVALUATION KIT CONTENTS

- EVAL-ADM3050EEBZ evaluation board
- ADM3050EBRIZ**
- ADP7104**
- LTC6900**

DOCUMENTS NEEDED

- ADM3050E** data sheet

GENERAL DESCRIPTION

The EVAL-ADM3050EEBZ allows the user to evaluate the **ADM3050E** isolated signal and power transceiver for controller area network (CAN) or CAN with flexible data rate (CAN FD) networks. The EVAL-ADM3050EEBZ allows all of the input and output functions to work without the need for external components.

Based on the Analog Devices, Inc., *iCoupler*® technology, the **ADM3050E** integrates logic side on-off keying (OOK) signal isolation channels and an Analog Devices *isoPower*® dc-to-dc converter to provide regulated, isolated power that is well below EN 55022 Class B limits when transmitting on a 2-layer printed circuit board (PCB) with ferrites.

The EVAL-ADM3050EEBZ comes populated with the **ADM3050E**.

Full specifications of the **ADM3050E** can be found in the **ADM3050E** data sheet, available from Analog Devices and must be consulted in conjunction with this user guide when using the EVAL-ADM3050EEBZ.

REVISION HISTORY

10/2018—Revision 0: Initial Version

EVALUATION BOARD HARDWARE USING THE EVALUATION BOARD

Figure 1 shows the EVAL-ADM3050EEBZ. The V_{DD1} and V_{DD2} supply pins of the ADM3050E device must be supplied with input power. The V_{DD1} pin and the V_{DD2} pin can be powered directly or through the fixed output 5 V on-board low dropout (LDO) regulators. The VDD1 side LDO input supply requires a power supply voltage of 6 V to 9 V and connects to Pin 1 of Screw Terminal P3 (marked VIN_LDO1 on the silkscreen) and Pin 2 of Screw Terminal P3 (marked RTN_LDO1 on the silkscreen). The VDD2 side LDO input supply also requires a power supply voltage of 6 V to 9 V but connects to Pin 1 of Screw Terminal P6 (marked VIN_LDO2 on the silkscreen) and Pin 2 of Screw Terminal P6 (marked RTN_LDO2 on the silkscreen).

Using the LDO, the complete board can be powered by a 9 V battery (when testing for electromagnetic compatibility (EMC), for example). The ADP7104 LDO and LT3012 LDO both feature reverse current protection and can be left unpowered but connected to the EVAL-ADM3050EEBZ evaluation board when supplying power directly to the ADM3050E V_{DD1} and V_{DD2} pins. Additionally, the LT3012 is protected against reverse voltages to the input power pin. This LT3012 feature can be used in conjunction with the ADM3050E device bus fault tolerance to protect against miswire damage in applications where the supply power and CAN bus pins are manually wired.

PCB LAYOUT RECOMENDATIONS

Place a 0.1 μ F capacitor as close as possible to VDD1 and GND1 and another 0.1 μ F capacitor as close as possible to VDD2 and GND2 as shown in the layout example for the EVAL-ADM3050EEBZ (see Figure 2).

Figure 2. Layout Example for the EVAL-ADM3050EEBZ

EN 55022 RADIATED EMISSIONS TEST RESULTS

The EVAL-ADM3050EEBZ passes the EN 55022 Class B standard.

The EVAL-ADM3050EEBZ is configured and tested with a 5 V power supplied to the V_{DD1} pin from the ADP7104 regulator output and the V_{DD2} pin from the LT3012 regulator output. The on-board LTC6900 generates the clock signal input to the TXD pin and is set to a given frequency with the on-board potentiometer. Battery packs with short leads are used for emissions testing to supply the ADP7104 regulator and the LT3012 regulator inputs.

Figure 3 shows the measurements carried out according to the EN 55032 Class B standard in a semianechoic chamber at 10 m from 30 MHz to 1 GHz. Figure 3 shows the results of the peak horizontal scan (the worst case). These results demonstrate that the ADM3050E has a greater than 6.0 dB margin below EN 55032 Class B limits on a 2-layer PCB.

NOTES

**ESD Caution**

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
