

OPA2810DGK Evaluation Module

The OPA2810DGKEVM is an evaluation module for the dual-channel OPA810 amplifier in the DGK (VSSOP-8) package. OPA810 is a FET-input, voltage-feedback operational amplifier with extremely low input bias current. The OPA2810DGKEVM is designed to quickly and easily demonstrate the functionality and versatility of the amplifier. The EVM is ready to connect to power, signal source, and test instruments through the use of onboard connectors. The EVM is configured for easy connection with common 50- Ω laboratory equipment at its inputs and outputs. Each amplifier is configured for single-ended input with a non-inverting signal gain of 1 V/V at the device output. The OPA2810DGKEVM has a total onboard load of 2 k Ω to each amplifier. The output resistor network converts the output to a 50- Ω impedance source. The evaluation module can be easily configured for other functions, gains, and single- or split-supply operation.

1 Features

This EVM supports the following features:

- Configured for split-supply operation and easily modified for single supply
- Default gain of 1-V/V configuration can be easily reconfigured for other gains
- Designed for easy connection to standard 50- Ω input and output impedance test equipment
- Simple interface to the inputs and outputs through the SMA connectors

2 EVM Specifications

Table 1 lists the EVM specifications.

Table 1. EVM Specifications

	PARAMETER	VALUE
	Single-supply voltage range ($V_- = \text{ground}$)	4.75 V to 27 V
$V_{S\pm}$	Split-supply voltage range	± 2.375 V to ± 13.5 V
$I_{O\pm}$	Supply current (no load)	3.5 mA per amplifier
	Input voltage	$V_{S\pm}, \text{Max}$
I_{OUT}	Linear output drive	± 50 mA

3 Power Connections

The OPA2810DGKEVM is equipped with test point connectors for easy connection of power. The positive supply input is red and is labeled V_+ . The negative supply input is yellow and is labeled V_- . The ground is black and is labeled GND.

3.1 Split-Supply Operation

To operate as split supply, apply the positive-supply voltage to V_+ , negative-supply voltage to V_- , and the ground reference from supply to GND.

3.2 Single-Supply Operation

To operate as single supply, connect both the V_- connector and the GND connector to ground and apply the positive-supply voltage to V_+ . Inputs and outputs must be biased per the specifications listed in the data sheet for proper operation.

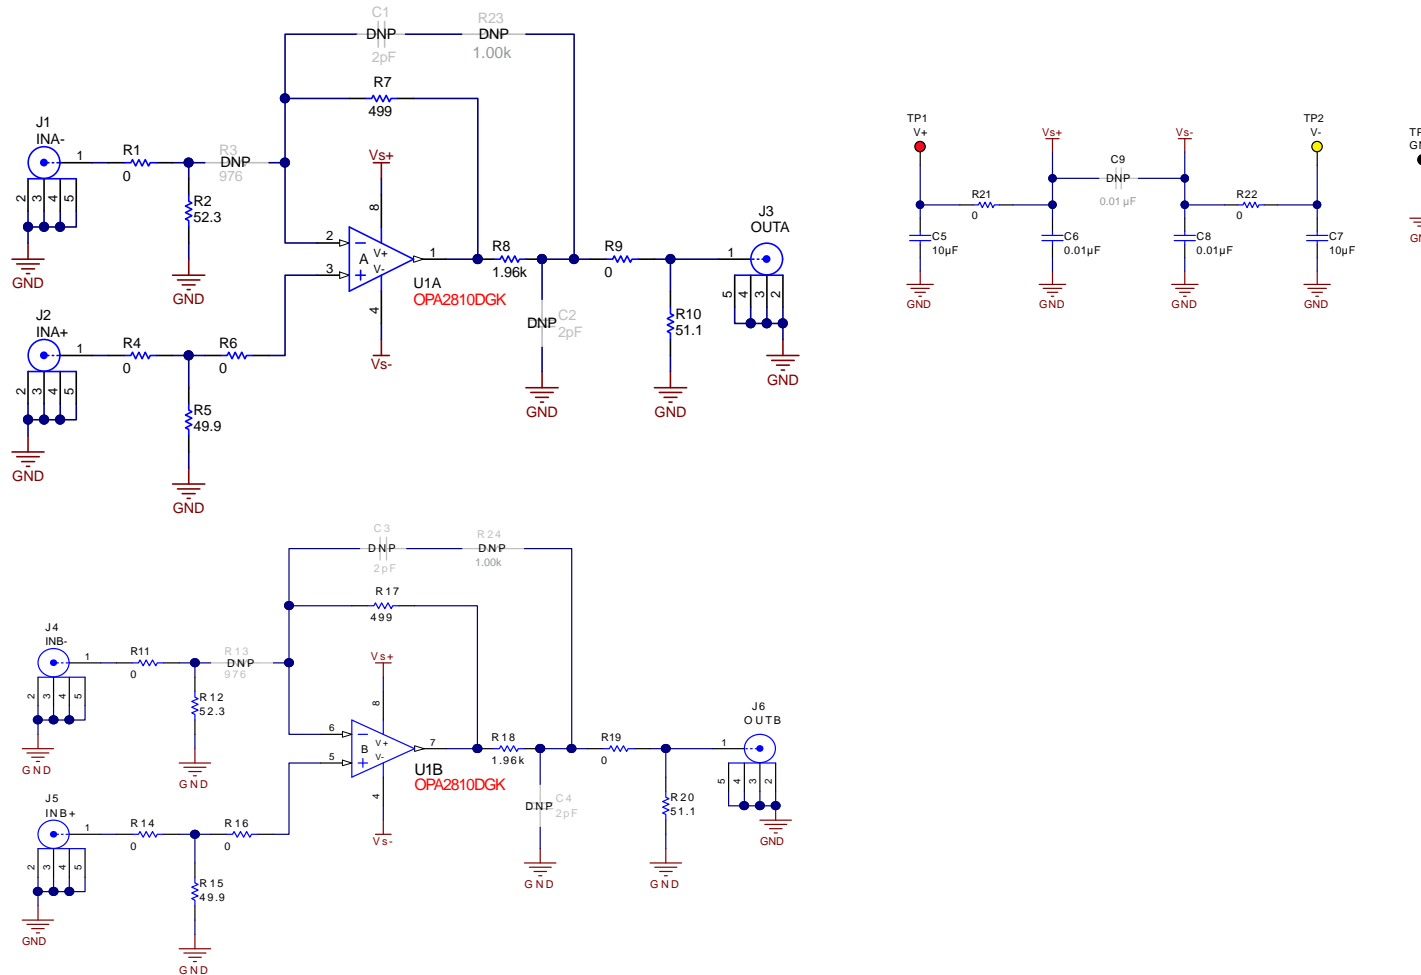

4 Input and Output Connections

The OPA2810DGKEVM is equipped with SMA connectors for connection of signal generators and analysis equipment. As shipped, the EVM is configured for a non-inverting gain of 1 V/V, split-supply operation, single-ended input and output with 50- Ω termination. For best results, signals must be routed to and from the EVM with cables having 50- Ω characteristic impedance. INA+ (J2) and INB+ (J5) must be used for single-ended input with 50- Ω source. OUTA (J3) and OUTB (J6) are the output connectors for amplifiers A and B respectively. A resistor network (R8, R9, and R10 for amplifier A; R18, R19, and R20 for amplifier B) at the output of the amplifiers convert the output signal to 50- Ω single-ended source, and provides a 2-k Ω load to the amplifier when terminated with 50- Ω load at J3 and J6. A 50- Ω line-impedance match at OUTA (J3) and OUTB (J6) must be preserved. This results in an output measurement loss, and the overall attenuation is approximately 38 dB. See the applications section, schematics, and layouts in the OPA2810 data sheet: [OPA2810 Dual High-Performance, Low-Power, Wide Supply Range, Rail-to-Rail Input/Output FET-Input Operational Amplifier](#), for more details on how to reconfigure the EVM.

IMPORTANT NOTICE FOR TI DESIGN INFORMATION AND RESOURCES

Texas Instruments Incorporated ("TI") technical, application or other design advice, services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using any particular TI Resource in any way, you (individually or, if you are acting on behalf of a company, your company) agree to use it solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources.

You understand and agree that you remain responsible for using your independent analysis, evaluation and judgment in designing your applications and that you have full and exclusive responsibility to assure the safety of your applications and compliance of your applications (and of all TI products used in or for your applications) with all applicable regulations, laws and other applicable requirements. You represent that, with respect to your applications, you have all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. You agree that prior to using or distributing any applications that include TI products, you will thoroughly test such applications and the functionality of such TI products as used in such applications. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

You are authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING TI RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY YOU AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You agree to fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of your non-compliance with the terms and provisions of this Notice.

This Notice applies to TI Resources. Additional terms apply to the use and purchase of certain types of materials, TI products and services. These include; without limitation, TI's standard terms for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>), [evaluation modules](#), and [samples](http://www.ti.com/sc/docs/sampterm.htm) (<http://www.ti.com/sc/docs/sampterm.htm>).
