CORE TECHNOLOGY

Glasses-free 3D Display Technology

1) Multi-angle field of view

Through the pupil tracking algorithm technology, the bottleneck of optical structure is broken, and the 3D vision within the range of 60 degrees is realized.

2) High definition

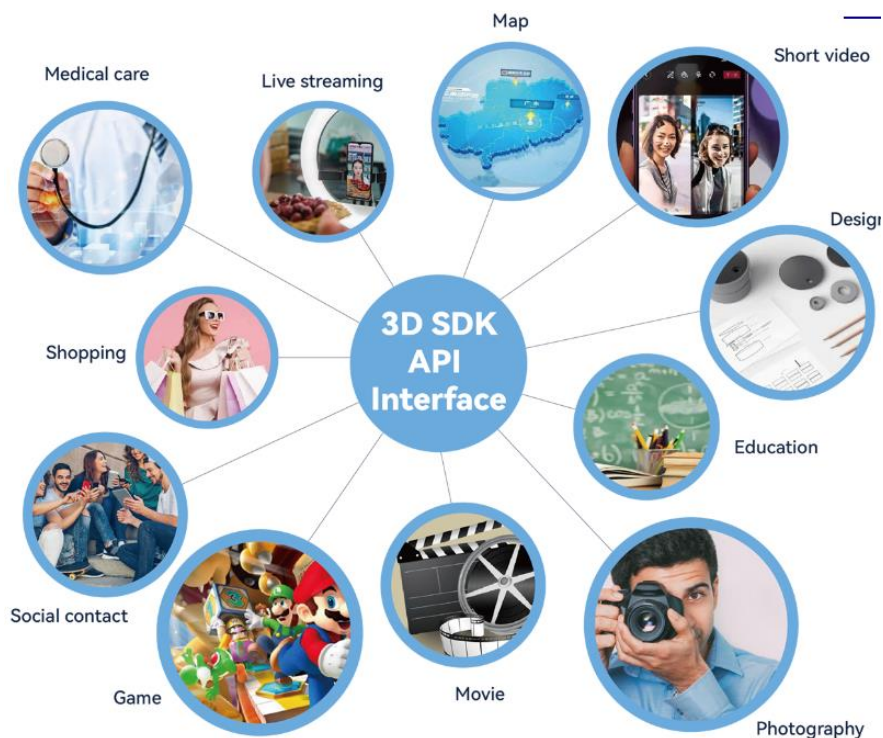

Different angles can be high-precision and real-time rendering, low crosstalk rate, high-definition without vertigo.

3) 3D strong effect: Depth effect and pop-out effect.

4) Mature program: Mass production has been achieved.

- Glasses-free 3D enabled by external and built-in application of optical configuration.
- Mass production available for 4, 5, 7.8, 10.75, 13, 15.6-inch glasses-free 3D display.
- Glasses-free 3D film supports all iPhone models and over 100 Android phones.
- Supports Android, iOS, Windows, and LCD, LED, OLED screens.

3D Internet Application Development Technology (SDK、API) Open Source

NAKED-EYE 3D IPHONE 14 PRO MAX. 6.7" SCREEN PROTECTOR

APPLICATION SCENARIO

3D TV and Movie

Lititong Glasses-free 3D Cell-phone Screen Protector and 3DFan Apps are available for mobile devices such as handsets and tablets to enable users to watch 3D movies without wearing glasses or head-mounted devices and enjoy stereoscopic visual effect.

3D Game

Lititong Glasses-free 3D Cell-phone Screen Protector and 3D game Apps are available for mobile devices such as handsets and tablets to see vivid 3D pictures without wearing glasses or head-mounted devices.

3D Shooting

Use 3D lens for 3D photography. Glasses-free 3D vision is realized via your mobile phone and 3D photography is as simple as shooting with mobile phone. Everyone can be a 3D content creator.

NAKED-EYE 3D IPHONE 14 PRO MAX. 6.7" SCREEN PROTECTOR

APPLICATION SCENARIO

3D Live Streaming

The combination of external 3D live streaming device and 3D Apps make live streaming scene realer. Viewers enjoy more vivid images and have zero-distance interaction with anchors.

3D Social Contact

Lititong Glasses-free 3D Cell-phone Screen Protector and 3D social contact Apps are available for mobile devices such as handsets and tablets to recreate offline social contact scenarios, enhancing the relationship between people.

Glasses-free 3D Visual Trainer

With super multi-point gaze, saccade and pursuit training, it prevents the damage caused by fixating at short distance for a long time, which leads to ciliary muscle spasm, crystalline lens bulging, diopter increase and axial elongation. The training also improves the information processing ability of the visual nervous system, thus improving the eyesight.
