Description

The Si533 dual frequency XO utilizes Skyworks Solutions' advanced DSPLL® circuitry to provide a low jitter clock at high frequencies. The Si533 is available with any-frequency output frequency from 10 to 945 MHz and select frequencies to 1400 MHz. Unlike a traditional XO, where a different crystal is required for each output frequency, the Si533 uses one fixed crystal to provide a wide range of output frequencies. This IC based approach allows the crystal resonator to provide exceptional frequency stability and reliability. In addition, DSPLL clock synthesis provides superior supply noise rejection, simplifying the task of generating low jitter clocks in noisy environments typically found in communication systems. The Si533 IC based XO is factory configurable for a wide variety of user specifications including frequency, supply voltage, output format, and temperature stability. Specific configurations are factory programmed at time of shipment, thereby eliminating long lead times associated with custom oscillators.

3. Ordering Information

The Si533 XO supports a variety of options including frequency, temperature stability, output format, and V_{DD} . Specific device configurations are programmed into the Si533 at time of shipment. Configurations can be specified using the Part Number Configuration chart below. Skyworks Solutions provides a web browser-based part number configuration utility to simplify this process. Refer to https://www.skyworksinc.com/en/Products/Timing to access this tool and for further ordering instructions. The Si533 is supplied in an industry-standard, RoHS compliant, 6-pad, 5 x 7 mm package. The Si533 supports output enable (OE) on pin 1.

Example Part Number: 533AB000108DGR is a 5x7mm Dual XO in a 6 pad package. Since the six digit code (000108) is > 000100, f0 is 644.53125 MHz (lower frequency) and f1 is 693.48299 (higher frequency), with a 3.3V supply and LVPECL output. Temperature stability is specified as ± 20 ppm. The part is specified for a -40 to +85 C° ambient temperature range operation and is shipped in tape and reel format.
