

# Fast switching diode chip in Emitter Controlled Technology

### Features:

- 1200V technology 120 μm chip
- soft, fast switching
- low reverse recovery charge
- small temperature coefficient
- qualified according to JEDEC for target applications

#### **Recommended for:**

power modules and discrete devices

### **Applications:**

 SMPS, resonant applications, drives

| Chip Type    | V <sub>R</sub> | <b>I</b> Fn | Die Size                    | Package      |
|--------------|----------------|-------------|-----------------------------|--------------|
| SIDC06D120F6 | 1200V          | 5A          | 2.45 x 2.45 mm <sup>2</sup> | sawn on foil |

# **Mechanical Parameters**

| Meenanioarranalieu  |                                  |  |                 |  |
|---|----------------------------------|--|-----------------|--|
| Die size  |                                  | 2.45 x 2.45  |                 |  |
| Area total  |                                  | 6  | mm <sup>2</sup> |  |
| Anode pad size  |                                  | 1.73 x 1.73  |                 |  |
| Thickness   |                                  | 120  | μm              |  |
| Wafer size  |                                  | 150  | mm              |  |
| Max. possible chips pe                                    | er wafer                         | 2520   |                 |  |

# **Further Electrical Characteristics**

Switching characteristics and thermal properties are depending strongly on module design and mounting technology and can therefore not be specified for a bare die.

# **Chip Drawing**

A: Anode pad

### Description

AQL 0,65 for visual inspection according to failure catalogue

Electrostatic Discharge Sensitive Device according to MIL-STD 883

### **Revision History**

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics. With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation, warranties of non-infringement of intellectual property rights of any third party.

#### Information

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office (www.infineon.com).

#### Warnings

Due to technical requirements, components may contain dangerous substances. For information on the types in question, please contact the nearest Infineon Technologies Office. The Infineon Technologies component described in this Data Sheet may be used in life-support devices or systems and/or automotive, aviation and aerospace applications or systems only with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support, automotive, aviation and aerospace devices or systems or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
