Board-to-Wire Swing-Lock Connector for Low-Profile Power Source

DF61 Series

Features

1.Reinforced Swing Lock Structure

Our unique swing-lock structure cradles the wire side plug and resists the plug from becoming disengaged due to handling strain or loads.

2.Header Lock Improves Plug Retention

During mating, the header lock engages with the plug assembly. The lock is reinforced with metal which adds strength to the lock and increases the retention between the header and the plug.

3.Compact Size- High Voltage

The compact 2.2 mm pitch connector has a voltage rating of 350V due to the long creep distance.

4.Solder Wicking Prevention

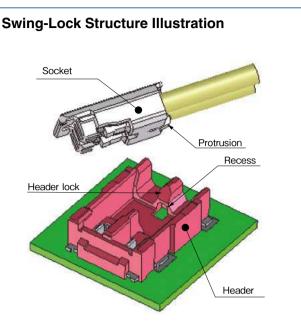

Header is molded in one piece. This ensures a tight fit between the contact and the header and prevents solder wicking.

5. High Current of MAX 5 Amps (AWG22)

A highly conductive material is used for the contacts. The material provides for a high current flow by reducing the contact resistance.

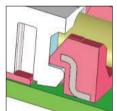

Applications

Digital cameras, digital video cameras, LED lights, laptop computers, tablet computers, portable devices, power supply equipment, etc.

The protrusion on the bottom side of the socket fits into a corresponding recess on the header. This aligns the socket into the correct mating position.

Before Mating

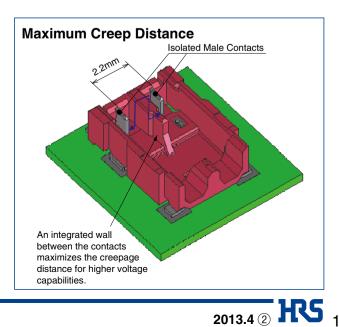

After Mating

The Header pushes down the protrusion of the socket and locks it in place.

The metal fitting is partly molded in the header's housing lock.

Tensile strength of the cable: 10N or greater

■Product Specifications

Ratings	Current rating 3.2A (with AWG26) 4A (with AWG24) 5A (with AWG22)		Operating Temperature Range-35~85°C(NoteOperating Humidity Range20~80%				
	Voltage rating	AC/DC 350V	Storage Temperature Range Storage Humidity Range	-10~60℃ 40~70%	(Note 2) (Note 2)		
Items	Specific	cations	Cond	itions			
1.Insulation resistance	1000MΩ or greater		Measured at DC 500V				
2.Withstanding voltage	No flashover or breakdo	own	AC1700V applied for one minu	te			
3.Contact resistance	10mΩ or less		Measured at 20mV or less, 1mA				
			Frequency 10-55Hz, half amplitude 0.75 mm, 10 cycles for				
4. Vibration resistance	No electric outage of 1	us or more	each of 3 directions				
5.Shock resistance	No electric outage of 1	us or more	Acceleration 490 m/s ² , 11ms; half sin wave: 3 each for 3 directions				
6.Humidity resistance	Contact resistance $20m\Omega$ or less, insulation resistance $500M\Omega$ or greater		Temperature 40 \pm 2°C, humidity 90-95%, left for 96 hours				
7.Temperature cycle	Contact resistance $20m\Omega$ or less insulation resistance $500M\Omega$ or greater		5 cycles (-55°C: 30 minutes → 5-35°C: 2-3 minutes → 85°C minutes → 5-35°C: 2-3 minutes)				
8.Insertion/extraction life	Contact resistance20m	Ω or less	Insertion/extraction: 30 times				
9.Solder heat resistance	No melting of resin part	affecting performance	Reflow: Per recommended temperature profile Hand solder: Manual soldering iron 350±10°C for 3 seconds				

(Note 1) Includes temperature elevation by conduction.

(Note 2) The term "storage" refers to the long-term storage conditions of unused connectors before PCB mounting. The operating temperature range applies to connectors in non-conduction state after PCB mounting or those in temporary storage during transportation, etc.

(Note 3) The above specifications are representative for this series. Please refer to "delivery specifications" for official individual agreement.
