

The Start Pen

Controlled Application of Liquid Solutions

Can be used with many different kinds of materials*

- Fluxes
- Alcohol
- Protective Coatings
- Lubricating Oil
- Inks

Refillable without special equipment

Inexpensive

Fine tip allows you to get into smallest of areas

Small size, large capacity make this pen ideal for tool kits, rework, as well as post assembly applications

Transparent cartridge allows you to see the amount of remaining material

Material is dispensed by lightly squeezing the barrel; you control the amount of material flow

Tight fitting cap prevents evaporation of material in barrel; this extends the life and purity of material

Ergonomic design for ease of use

Can be refilled with your favorite materials

Constructed of rugged polypropylene

Small enough to fit into a shirt pocket or repair kit

**All material should be pre-tested for compatibility with pen.*
