Tri-axial Groundborne Vibration Meter VM-56

Tri-axial Groundborne Vibration Meter VM-56

Simultaneous PPV, VDV, Dominant Frequency & Displacement

Tri-axial Groundborne Vibration Meter **VM-56**

The VM-56 is a groundborne vibration meter capable of simultaneously calculating the measurement quantities defined by DIN 45669-1, ISO 8041 and other national measurement standards. Like other Rion products, it is characterized by excellent build-quality and exceptional ease of use. It is suitable for a wide range of applications including attended measurements, unattended surveys and live-to-web monitoring.

Applicable standards

Features

DIN 45669-1: 2010-09

(Measurement of vibration immission -Part 1: Vibration meters - Requirements and tests) *Measurement range, measurement frequency range only ISO 8041 : 2005, ISO 8041-1 : 2017 (Human response to vibration

Measuring instrumentation)

High Quality & Easy of Use

Simultaneous tri-axial measurement. Compact and lightweight design.

Simultaneous measurement

of multiple parameters

including PPV and VDV.

Data stored as CSV files on an SD card.

waveform recording function and 1/3 octave band analysis function available as optional programs.

User definable PPV vs Frequency

comparator output supports DIN 4150:

Suitable for use in a live-to-web system (please contact us for further details).

Configuration Example for Remote Continuous Monitoring

Measurement results and data from the VM-56 can be accessed by computers, tablets or smartphones via a network connection for continuous remote monitoring.

Mounting options

DIN Plate VP-54D

Option programs

Waveform Recording Program **VX-56WR**

PUT

Meter 56

AL

Allows recording vibration waveforms on SD card as WAV files. The recording process is carried out simultaneously with the standard VM-56 functions.

2 kHz sampling with 24 bit or 16 bit can be selected

Max. recording time (at 16 bit)

Memory card Sampling frequency	512 MB	2 GB	32 GB
2 kHz		Approx. 32 hours	Approx. 698 hours

Software / Report Creation

Waveform Analysis software for Groundborne Vibration AS-70GV

Allows use of WAV files recorded with VM-56 + VX-56WR for graph display, level processing, frequency analysis (octave

band analysis / FFT analysis), recalculation (PPV, KB, VDV), and file output.

1/3 Octave Band Analysis Program **VX-56RT**

Enables measurement and logging of 1/3 octave acceleration levels simultaneously with broadband parameters (e.g. PPV, Dominant Frequency, VDV, MTVV). Can be used concurrently with VX-56WR.

User definable weighting enables compliance with ISO 2631-2:1989/RD1367

1/3 Octave Band Analysis screen

Excel macro for report output (Free of charge. Now available on our website)

Facilitates the creation of reports from measurement data. Data types: VM-56 auto store data. VX-56RT auto store data *Manual store data are not supported Measurement target: PPV, displacement, acceleration (rms), VDV, MTVV, KB_{FT} value, v_{eff,max.30} value

Applicable standards	DIN 45669-1: 2010-09 (Frequency, Measurement range compliance), SBR Meten
	en beoordelen van trillingen, Deel A: Schade aan gebouwen 2010, Deel B: Hinder
	voor personen 2013, ISO 8041: 2005, ISO 8041-1: 2017, CE marking, WEEE directive
Measurement functions	Tri-axial simultaneous measurement
Measurement values	
In accordance	Peak particle velocity v max (PPV)
with DIN	Dominant frequency fmg (D.F.)
	Weighted vibration maximum value KB _{Fmax}
	Maximum KB _F value over 30-second cycle KB _{FT}
In accordance	Corrected acceleration effective value Acc.
with ISO	Maximum transient vibration value MTVV Vibration dose value VDV
	Crest factor C.F.
In accordance	Maximum weighted vibration value veff.max
with SBR	Maximum veff over 30-second cycle veff, max 30
Others	Displacement (0-p value) Disp.
	Combined PPV for 3 axes PVS
Waveform recording (Option)	Time waveform of acceleration signal a(t)
1/3 octave band	Time-weighted time average, maximum acceleration
analysis value (Option)	Tri-axial synthesis of band max overall Law
Measurement frequency range	0.5 Hz to 315 Hz
Frequency	For acceleration, velocity, and displacement signals, the following frequency range limits can be selected
bandwidth limits	Lower limit: 0.5 Hz, 1 Hz, 4 Hz
	Upper limit: 80 Hz, 100 Hz, 250 Hz, Sensor Dependent (LPF OFF)
Measurement range	
Measurement range for VM-56	Vibration velocity: 0.03 to 100 mm/s
TOP VIVI-56	Weighted vibration amount: 0.02 to 100 mm/s (Reference 16 Hz) Maximum absolute waveform value: 0.05 to 100 mm/s (Reference 16 Hz)
	Vibration acceleration: 0.0003 to 10 m/s ²
	Displacement (0-p): 0.01 to 10 mm (0.5 to 4 Hz)
	Measurement range compliant with SBR-Deel B
	Vibration velocity: 0.02 to 100 mm/s (Frequency bandwidth 1 to 80 Hz)
Instrument noise	
Vibration acceleration	0.0001 m/s ² (Measurement frequency range 1 to 80 Hz)
Vibration velocity	Max. 0.01 mm/s (Measurement frequency range 1 to 80 Hz)
Frequency correction	No weighting (Common band filter for ISO and DIN / SBR band filter)
	KB (DIN 45669-1 compliant)
	Wb, Wd, Wm characteristics (ISO 8041 compliant)
	Hv (SBR-B compliant)
Measurement range	
Dynamic range	Max. 100 dB
Sampling frequency Store modes	2 kHz 3 modes (Manual, Auto, Timer Auto), Data format: CSV
Manual	Measurement results stored with measurement start time in one memory address
	Data stored in internal memory or on SD card (Internal memory: max. 1000 tri-axia
	data sets, SD card: dependent on card capacity)
	Processed value store: PPV, Dominant Frequency (D.F.), KB _{Fmax} , MTVV, VDV, Crest Factor (C.F.
	Displacement (Disp.), PVS, Overload and Under Range Flags for each calculation cycle.
Auto	Continuous storing of various types of processing results for each calculation cycle Data stored on SD can
	Store modes: Instantaneous store, calculation store, level trigger store
	Instantaneous store: Acc. rms data stored every 100 ms
	Processed value store: PPV, Dominant Frequency (D.F.), KB _{FT} , MTVV, VDV, Crest Factor (C.F.
	Displacement (Disp.), PVS, Overload and Under Range Flags for each calculation cycle
	Calculation cycle: 1 s to 24 h
Timer Auto	Processed values are continuously recorded for each store cycle at the set
	measurement start / stop time.
	Sleep function (power save mode until measurement start) available Data stored on SD car
	Store modes: Instantaneous store, Calculation store
	Instantaneous store: Acc. data stored every 100 ms
	Calculation store: Processing results for each calculation cycle
	Calculation cycle: 1 s to 24 h
Magguromant time	Max 200 days (Auto store mode only with 100 ms off)
	Max. 200 days (Auto store mode only, with 100 ms off)
Data recall	Store data name, store data browse, time browse, waveform yes/no check

Waveform Recording Program VX-56WR

Recorded signal	Acceleration	Data format	WAV format	
Sampling frequency	2 kHz	Frequency correction	None	
Bit word length	24 bit, 16 bit	Available channels for recording	3 channels (X, Y, Z)	

1/3 Octave Band Analysis Program VX-56RT

Analysis Basis	Acceleration	
Applicable standards	IEC 61260-1 2014 class 1, ISO 2631-2*, RD1367* * With user weighting	
Filters	1 Hz to 315 Hz (26 bands)	
Frequency weighting	None (band-limiting filter only) (Wb, Wd, Wm, User weighting)	
Store modes	Same store modes as VM-56, same processing values are stored.	
	Processing values listed below are also stored.	
Manual	Time average of 1/3 octave Acc for each calculation cycle, and time-weighted maximum value	
Auto/Timer Auto	Instantaneous store: Time-weighted instantaneous value of 1/3 octave Acc. every 100 ms	
	Calculation store: Time average of 1/3 octave Acc. for each calculation cycle,	
	and time-weighted maximum value	
Analysis target channels	3 channels simultaneously (X, Y, Z)	
User Weighting	Enables the user to set amplitude weightings for 1/3 octave band:	
	Frequency range: 1 Hz to 315 Hz	
	Adjustable range: +3.00 dB to -70.00 dB	

Options

Product	Model
Waveform Recording Program (supplied on 2 GB SD card)	VX-56WR

DIN plate	VP-54D
L-bracket	VP-54L

*1 Use RION fully guaranteed products.

*2 Protection against harmful dust and water splashing from any direction.

Precautions regarding waterproofing

Before use, verify that the rubber side cover and the battery compartment lid are firmly closed. To maintain the water and dust proof rating, internal packing replacement is required every two years (at cost).

*3 Example of frequency-dependent comparator setting

RION Co., Ltd. is recognized by the JCSS which uses ISO/IEC 17025 (JIS Q 17025) as an accreditation standard and bases its accreditation scheme on ISO/IEC 17011. JCSS is operated by the accreditation body (IA Japan) which is a signatory to the Asia Paofic Laboratory Accreditation Cooperation (APLAC) as well as the International Laboratory Accreditation Cooperation (ILAC). The Quality Assurance Section of RION Co., Ltd. is an international MRA compliant JCSS operator with the accreditation number JCSS 0197.
